

# Photos

Xaar<sup>®</sup> Hi-resolution inkjet printer

Provides the most competitive running costs in the market

# ZERO MAINTANCE LOW PRINT COST NO SOLVENTS

Incode Marking is also glad to announce the development of the first **low cost TL-395 UV Led light** that in combination with our printer provides the most economical UV curing system in the market offering Superior printing adhesion even if compared with Cij inkjet printers technology.

Did you "program" your smart phone when you first bought it?  
Probably not, you simply used it.

Incode Marking has implemented the same idea in our latest Photos inkjet printer with touch screen controller and Android technology. All everyday print functions use familiar icons and operators no longer need training to enter messages. Photos inkjet printer has been designed for **low cost printing** applications. An out of the box simple printer equipped with Android technology and a 7" Touch screen LCD. Prints multiple lines of text, graphics, barcodes and 2D codes with 18mm total print height. Different inks enable printing onto non-porous materials (plastic, glass, metal) or porous surfaces (cardboard, wood, gypsum). The simplicity of this printer and the ease of installation or swapping between production lines guarantee **maximum uptime in a production factory**. It offers a real alternative to complex CIJ printers at a very affordable price. It is typically used to print best before dates onto products on a production line in high resolution print quality. Free PC software that can be used for creating, downloading and storing complex message designs.

## HD

### High Resolution Coding & Marking

1 to 8 lines of print, with 2-18mm print height.

### Touch Controller

Photos inkjet equipped with Android technology and a 7" Touch screen LCD.

### Graphics, Logos & Barcodes

High resolution printing of multiple barcodes and 2D codes with 18mm total print height.

### True Type Font & Unicode

Enables message creation in any font and in any language.

### Large Solvent Based Ink Cartridge

Low cost coding and clean inking system, ideal for printing on to porous and non-porous surfaces.
